

EX 5 - Task Analysis –Food order Booking System

Task Analysis – Food Order Booking system

Task Analysis

Task Analysis is the process of breaking down a user's interactions with a Food Ordering or Delivery App into smaller, manageable steps. It helps to understand how users browse restaurants, select food, place an order, and receive delivery. Task analysis highlights user needs, pain points, and areas for improving the ordering experience.

Key Aspects of Task Analysis:

- **Understanding what tasks users perform (browsing, selecting, ordering, payment).**
- **Identifying the sequence of actions required to complete a food order.**
- **Analyzing user pain points such as unavailable menu items, failed payments, or delivery delays.**
- **Defining requirements to improve user experience and ensure a smooth ordering process.**

User Flow

User Flow is a visual representation of how users navigate through the Food Ordering App to successfully place an order. It shows each step from opening the app to receiving the order confirmation.

User Flow for Food Ordering / Delivery App

Start → Open App → Login/Register → Browse Restaurants → Select Restaurant → View Menu → Add Items to Cart → Review Cart → Continue Shopping? → Proceed to Checkout → Enter Delivery Details → Choose Payment Method → Payment Confirmation → Order Confirmation → End

User Flow – Step by Step

Step 1: Start

- The user opens the Food Ordering App.
- The home screen or splash screen is displayed.

Step 2: Login or Register

- Existing users log in using email/phone and password.
- New users register by entering Name, Email, Phone, and Password.

Step 3: Browse Restaurants

- The user can browse restaurants by cuisine, rating, or popularity.
- A search bar may be used to find specific restaurants.

Step 4: Select Restaurant

- The user selects a restaurant from the list to view available menu items.

Step 5: View Menu

- Menu items are displayed with images, prices, and descriptions.
- Users can customize items (e.g., extra toppings, spice level).

Step 6: Add Items to Cart

- User selects items to add to the cart.

EX 5 - Task Analysis –Food order Booking System

- The cart keeps a running total of the items selected.

Step 7: Continue Shopping?

- Decision: If the user wants to continue ordering from other restaurants or menu items:
 - Yes → Return to Browse Restaurants
 - No → Proceed to Cart

Step 8: Review Cart

- User reviews selected items, can update quantity or remove items.

Step 9: Proceed to Checkout

- User clicks checkout to finalize the order.

Step 10: Enter Delivery Details

- The user enters the delivery address and contact number.

Step 11: Select Payment Method

- Payment options include:
 - Online Payment (UPI, Cards, Wallets)
 - Cash on Delivery (COD)

Step 12: Payment Confirmation

- If online payment is selected, the system verifies the transaction.
- If payment fails, the user is prompted to retry.

EX 5 - Task Analysis –Food order Booking System

Step 13: Order Confirmation

- **After successful payment, an order confirmation message is displayed.**
- **Order ID, estimated delivery time, and tracking options are shown.**

Step 14: End of Process

- **The ordering process is complete.**
- **The user can track the order, reorder, or browse for more food.**

Flow Chart:

Wire Frame:

1. Splash Screen (App Launch)

- Displays the app logo/name “**ODERLY**”
- Uses a clean, minimal design with food-related icon (fork, knife, spoon)
- Tagline: “...*food in order*”

2. Login / Authentication Screen

EX 5 - Task Analysis –Food order Booking System

The image shows a login interface with a light gray background and yellow circular accents in the corners. At the top, the text "Welcome back!" is displayed in green. Below this, there are two input fields: "email address" and "password", both with light gray borders and placeholder text. A red "Login" button is positioned below the password field. Underneath the button is a horizontal line with the word "OR" in the center. Below the line are two more buttons: a blue "Login with facebook" button with a Facebook icon and an orange "Login with email" button with an email icon. At the bottom, there is a link that says "don't have an account> sign up" in blue text.

- Shows “**Welcome back!**” message
- User input fields:
 - Email address
 - Password
- Login options:
 - **Login button** (main action)
 - **Login with Facebook**
 - **Login with Email**
